

NAME OF BOOK

**MANUAL OF OCEANOGRAPHIC OBSERVATIONS AND
POLLUTANT ANALYSES METHODS (MOOPAM)**

THE BOOK IN BRIEF

The Manual is the result of careful review by marine scientists from the Member States and Regional and International Organizations who met at ROPME Secretariat during 28 February – 3 March 1998. The main objective of this manual is to provide data on oceanographic characteristics, petroleum hydrocarbons, selected chlorinated hydrocarbons and heavy metals in the ROPME Region. It is designed as a guide to the

field surveys, sampling and analytical methods to be used by the participating institutions for implementation of the Monitoring and Research Programme for oceanographic characteristics and oil and non-oil pollutants in the Kuwait Action Plan (KAP) Region

TABLE OF CONTENTS IN GENERAL

- I. Introduction
- II. Marine Meteorology, Physical Oceanography and Sea Surface Observations
- III. Chemical Oceanography
- IV. Sedimentological Analyses
- V. Analysis of Trace Metals
- VI. Analysis of Petroleum Hydrocarbons
- VII. Biological Parameters
- VIII. Remote Sensing Applications
- IX. Annexes
- X. Tables
