

NAME OF THE BOOK

OIL SPILL INCIDENTS IN ROPME SEA AREA (1965-2002)

THE BOOK IN BRIEF

It aims at listing, describing and classifying the oil spills and the incidents which have caused these spills to take place. Each individual incident is studied by MEMAC in collaboration with the Member States in order to focus on weaknesses which lead to similar events. The publication gives special attention to the main categories related to oil spill pollution such as the source of pollution, type and size of the polluter, date, location and reason of the incident, amount and type of the spill.
