

NAME OF THE BOOK

**GUIDELINES FOR THE JOINT AND/OR COMBINED EFFLUENT
TREATMENT FOR THE ROPME REGION**

THE BOOK IN BRIEF

The objective of this document is to present collected and evaluated information about issues concerning the joint and/or combined treatment of municipal and industrial effluents in a way, which will help its users to assess various options needed for taking practical and realistic measures for the effective control of wastewaters. It describes the aspects of pretreatment of industrial wastewaters from SME's need for combined treatment as well as how several industrial facilities can cope with a common treatment system for their effluents.

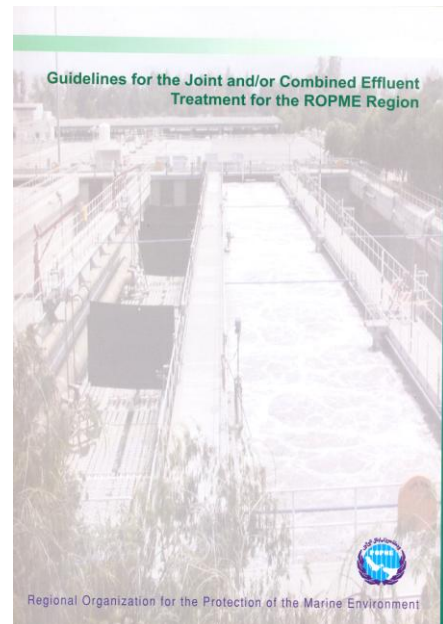

TABLE OF CONTENTS IN GENERAL

- I. Introduction
- II. Industrial Waste Waters
- III. Treatment Methods for Industrial Waste Waters
- IV. Combined Treatment
- V. Joint Treatment of Effluents
- VI. Conclusions-Recommendations
- VII. References
- VIII. Appendices
