

NAME OF THE BOOK

**GUIDELINES ON SEWAGE TREATMENT AND DISPOSAL FOR
THE ROPME REGION, INCLUDING GUIDANCE FOR
SUBMARINE OUTFALL STRUCTURES**

THE BOOK IN BRIEF

The document aims to provide comprehensive and practical information to its users about important aspects concerning planning and management of options for sewage collection, treatment and disposal into coastal waters. The main objective is to review and evaluate existing information concerning sewage management, in particular the information contained in the documents provided by international institutions and to adapt it to the requirements of the Protocol for the Protection of the Marine

Environment against Pollution from Land Based Sources from the ROPME Sea Area. The guidelines deal with urban wastewaters and effluents from urban wastewater treatment plants for domestic and pre-treated industrial wastes.

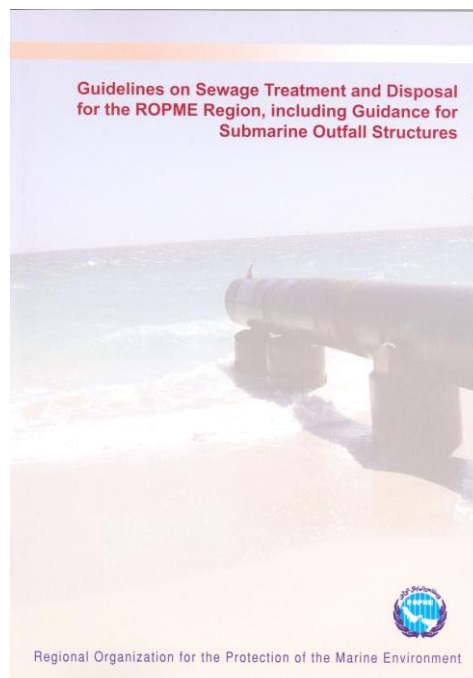

TABLE OF CONTENTS IN GENERAL

- | | |
|--|--|
| I. Introduction | VI. Monitoring of effluents of water bodies |
| II. The Marine Environment | VII. Economic instruments and cost recovery mechanisms |
| III. Pollution Sources | VIII. Conclusions and Recommendations |
| IV. Selection and Design of Municipal Waste water collection, treatment and disposal systems | IX. References |
| V. Environmental impact assessment of wastewater management facilities | X. Appendices |
